**To whomever it may concern**

This letter is in support of **Ibrahim Alhas**.

I have known Ibrahim since September 2019, in my role as his personal tutor during his time studying at King's for his MSc in Artificial Intelligence, for which he is due to graduate this winter. During his time at King's, I have had the opportunity to meet with Ibrahim on many occasions and it is clear that he is a motivated and driven individual who took a very active role in his education. His passion for Artificial Intelligence and Machine Learning is evident, both from his choice of modules and topic for his final year project "*Fact vs Fiction Classification*", and also from my discussions with him during our tutor meetings. Throughout the year, Ibrahim was always punctual and I very much enjoyed our scheduled personal tutor meetings.

Ibrahim's final grades from his studies at King's have yet to be ratified by our exam board, but based on his previous academic track record — graduating in the first class with honours from his previous institute — I have high hopes that he will continue to perform well academically.

From my discussions with his MSc project supervisor, it is clear that Ibrahim showed a deep understanding of the subject matter, on the topic of machine-learning aided classification, and was able to pose interesting and probing questions on the topic. Despite the challenges of faced by the onset of the coronavirus pandemic, Ibrahim was able to complete his project and submit a novel and sophisticated piece of software coupled with with a well-written and high-quality report.

Ibrahim is hard-working and respectful, and I have no reservation that he will continue to excel at whatever roles await him in his future. Should you have any further questions, feel free to contact me.

Your Faithfully,

A handwritten signature in black ink, appearing to read "Chris Hampson".
